HMR INSTITUTE OF TECHNOLOGY (GGSIP University) ———— **2021-2025**
BTech (Computer Science & Engineering) (CGPA – 8.02)

SKILLS

- PROGRAMMING LANGUAGES - HTML, CSS, JavaScript
- LIBRARIES AND FRAMEWORK - Bootstrap, jQuery, ReactJS

EXPERIENCE

BUSINESS WEB SOLUTIONS ——— 22 July- Present

Full Stack Web Developer Intern

- Successfully mirrored the original Rocket Man website's design. Emphasized a minimalistic and space themed design and uniform appearance across multiple browsers on a PC.
- Developed a home page of a clone website for "Printo", a personalized gift delivery platform. Implemented dynamic product gallery, integrated sorting and filtering options for easy navigation.
- Designed and developed a dynamic web application that generates random star war character data using Star Wars API.

PRODIGY INFOTECH ——— 10 January- 10 February 2024

Frontend Web Developer Intern

- Developed a dynamic, browser-based Tic-Tac-Toe game using core web technologies ensuring responsive design with adaptive layout, smooth game mechanics and cross browser compatibility.
- Created a fully functional Stop watch application featuring real time timekeeping, start/stop/reset functionality and lap time recording. Ensured its consistent functionality and appearance across major web browsers.

CODSOFT ——— 20 September- 20 October 2023

Web Developer Intern

- Developed a fully functional digital calculator integrated with core arithmetic operations. Implemented error handling and input validation to prevent incorrect calculations.
- Designed a personal portfolio that included interactive elements and a custom content management system for updating and managing project information effortlessly.
- Designed a landing page for a Gymnasium's website.

COURSES

- The Complete 2023 Web Development Bootcamp (Udemy) Aug 2023
- Hands on approach to AI for real world application (IIT Kharagpur & TCS) Sep 2023 - Dec 2023
